Choose Elo for Your Digital Transformation

With Elo's approach to Android, including uniform SDKs, a constantly growing set of tools and an expansive lineup across sizes and form factors, users gain the advantage of years of development and customizations Elo has made for many global Enterprise customers. Choose Elo to easily deliver the convenience and familiarity of Android in secure, business-friendly solutions.

One Product.
Thousands of Uses.

The possibilities are endless with the I-Series. From self-order and self-checkout to order pickup and virtual assistants, pair the I-Series with a variety of stands to create your perfect kiosk. And for applications that require audio and video, the I-Series offers built-in digital microphones and an 8 MP camera.

Build Engaging Brand Experiences

Educate buyers, create brand awareness and drive purchases in store with an easy-to-use interactive platform that can adapt as needs change.

Create Your Perfect POS System

With a built-in I/O hub, USB-C connectivity and optional customer-facing display, easily convert your favorite I-Series into a powerful, industrial-designed POS system.

Elo Advantage

- **EloView®:** EloView allows users to deploy and securely manage their entire network of Android-powered Elo devices from anywhere around the world.

- **Unified Architecture:** Elo's common architecture spans across sizes and form factors for seamless device management and application development.

- **Commercial-Grade Performance:** Whether equipped with the Qualcomm Snapdragon 8-core Kryo processor or the Rockchip 6-core processor, the I-Series delivers the performance your experience needs.

- **EloCare℠ OS 360** – Take advantage of monthly security updates to keep your devices secure.

- **Elo OEMConfig** – Get immediate support for Elo's proprietary APIs on your preferred Android MDM platform, saving you months of effort as new releases become available.
